CLASSIFICATION OF EXPLOSIVES

Based upon a request by Dyno Nobel North America, (Formerly, The Ensign-Bickford Company), Crossroads Tower, Eleventh Floor, Salt Lake City, UT, the following items are classed in accordance with Section 173.56, Title 49, Code of Federal Regulations, (49 CFR). A copy of your application, all supporting documentation and a copy of this approval must be retained and made available to DOT upon request.

U.N. PROPER SHIPPING NAME AND NUMBER:
Pentaerythrite tetranitrate, wetted [or] Pentaerythritol tetranitrate, wetted, [or] PETN, wetted [with not less than 25 percent water, by mass, or] Pentaerythrite tetranitrate, [or] Pentaerythritol tetranitrate [or] PETN, desensitized [with not less than 15 percent phlegmatizer by mass], UN0150

60 gram / ft. HMX Nylon Detonating Cord in Non-
Propagating Packaging

NOTES:
The following packaging method is assigned: Inner Packaging - Trays, expanded plastic,
each containing not more than seventeen (17) feet of detonating cord in an interlocking
series of "Figure-8" configurations with a steel mesh clip inserted at each cord cross-over
point on the tray. Outer Packaging - Specification 4G fiberboard box, each containing not
more than twenty-nine (29) inner packagings or 500 feet total length of detonating cord in
a continuous strand.

**NOTES:**
This classification is only valid when the non-electric detonators are packaged by one of the two following methods:
Packaging Method for Detonators Containing More Than 550 Milligrams of PETN --
Inner Packaging - Trayblock, flame retarded compressed pulpbond with recessed cavities and a chipboard oversleeve, each containing not more than twenty-five (25) detonators in up to a 5x5 offset array with a unit-to-unit distance not less than 1.25 inches between any two devices. Intermediate Packaging - Box, fiberboard, each containing not more than four (4) inner packagings which have been previously overpacked in a foil barrier bag. Outer Packaging - Specification 4G fiberboard box, each containing one intermediate packaging.
NOTE: Con't – EX2002010271

Packaging Method for Detonators containing 550 milligrams or less of PETN:
Inner Packaging - Trayblock, flame retarded compressed pulpboard with recessed
cavities and a chipboard oversleeve, each containing not more than fifty (50) detonators in
up to a 5x10 offset array with a distance not less than 0.625 inches between any two
devices. Intermediate Packaging - Box, fiberboard, each containing not more than four
(4) inner packagings which have been previously overpacked in a foil barrier bag. Outer
Packaging - Specification 4G fiberboard box, each containing one intermediate
packaging.

NOTES:
This classification is only valid when the non-electric detonator assemblies have shock
tubing not less than 12 feet in length and are packaged as follows: Inner Packaging -
Fiberboard inset compartments, in the outer packaging, each containing not more than
forty-five (45) devices. Outer Packaging - Specification 4G fiberboard box, each
containing one or two inner packagings.

EBCo MS Harbor Master

NOTES:
This classification is only valid when the detonator assemblies are not less than 30 feet in length and are packaged in the following manner:
For 30 foot lengths only -
Inner Packaging - Bundles, affixed with wire, each containing not less than twenty (20) assemblies.
Outer Packaging - Specification 4G fiberboard box, each containing not more than four (4) inner packagings.

For 50 foot and longer lengths -
Inner Packaging - Bundles, affixed with wire, each containing not more than five (5) assemblies.
Outer Packaging - Specification 4G fiberboard box, each containing not more than twenty-eight (28) inner packagings.

PRODUCT DESIGNATION/PART NUMBER
DUAL EZTL non-electric delay detonator

NOTES:
This classification is only valid when the non-electric detonator body is contained within a separately molded plastic connector block, the shock tubing does not exceed 0.15 inches in diameter and is not less than 12 feet in length, and the detonator assemblies are packaged as follows:
Inner Packaging - Not necessary
Outer Packaging - Specification 4G fiberboard box, each containing not more than ninety (90) devices.

U.N. PROPER SHIPPING NAME AND NUMBER:
Detonator assemblies, non-electric, [for blasting], UN0361

U.N. CLASSIFICATION CODE: 1.4B
REFERENCE NUMBER: EX2002060006  
PRODUCT DESIGNATION/PART NUMBER: OPTISURFACE II (240)

NOTES:  
This classification is only valid when the non-electric detonator body is contained within a separately molded plastic connector block, the shock tubing does not exceed 0.118 inches in diameter, the lead azide base charge does not exceed 260 milligrams, and the detonator assemblies are packaged as follows:  
Inner Packaging - Dividers, cardboard egg-crate design, each containing one device per cell and not more than one hundred (100) devices in up to a 10x10 array.  
Outer Packaging - Specification 4G fiberboard box, each containing not more than two inner packagings, separated with a fiberboard pad.  

U.N. PROPER SHIPPING NAME AND NUMBER:  
Detonator assemblies, non-electric, [for blasting], UN0361  

U.N. CLASSIFICATION CODE: 1.4B

REFERENCE NUMBER: EX2002060007  
PRODUCT DESIGNATION/PART NUMBER: OPTISURFACE II (120)

NOTES:  
This classification is only valid when the non-electric detonator body is contained within a separately molded plastic connector block, the shock tubing does not exceed 0.118 inches in diameter, the lead azide prime charge does not exceed 100 milligrams, the PETN base charge does not exceed 140 milligrams and the detonator assemblies are packaged as follows:  
Inner Packaging - Dividers, cardboard egg-crate design, each containing one device per cell and not more than one hundred (100) devices in up to a 10x10 array.  
Outer Packaging - Specification 4G fiberboard box, each containing not more than two inner packagings, separated with a fiberboard pad.

**U.N. CLASSIFICATION CODE:** 1.4B
REFERENCE NUMBER: EX2002090260
PRODUCT DESIGNATION/PART NUMBER: EBCo EZ DET Non-Electric Detonator Assembly, EBCo MS Unit Non-Electric Detonator Assembly

NOTES:
This classification is only valid when the shock tube lengths are not less than 80 feet, the shock tube diameters are not more than 0.150 inches and the electric detonators are packaged as follows:
Inner Packaging - Fiberboard separator in outer packaging.
Outer Packaging - Specification 4G fiberboard box with two compartments, each containing not more than twenty-five (25) devices per compartment and not more than fifty (50) devices per outer package.

U.N. PROPER SHIPPING NAME AND NUMBER:
Substances, explosive, n.o.s., UN0480

U.N. CLASSIFICATION CODE: 1.4D

REFERENCE NUMBER: EX2002060166
PRODUCT DESIGNATION/PART NUMBER: Explosives Contaminated Materials-Graham
(Revised and Amended Listing - June 2002)

NOTES:
This classification is only valid when the explosives contaminated materials contain not more than eight (8) percent by weight of any or all explosive substances. The following packaging method is assigned:
Inner Packaging - Bags, static-resistant plastic, each containing not more than twenty-five (25) pounds net weight of explosive-contaminated materials.
Outer Packaging - Specification 1G fiberdrum, or Specification 4G fiberboard box, each containing not more than eight (8) inner packagings.
